

TRANSPORT

Retail service stations, commercial sites or other delivery, we have the experience to handle the load professionally. We also offer daily fuel price quotes for all of your transport fuels.

TANKWAGON

SynEnergy will provide you with a tank, pump, filter, hose & nozzle and keep your tank full. Our well trained and experienced Petroleum Sales Representatives will maintain and service your tanks.

WET HOSING

Prefer not to have a fuel tank on your property? Let us come to you and fill your fleet directly from our tankwagon. We will arrive and fill your fleet before the start of your business day.

JOB SITE TANKS – TANK MONITORING

Our job site tank program conveniently helps the construction industry providing fuel when and where it's needed. Tank monitors can remotely send alerts when a tank becomes low and can notify you when fuel is received. Online monitoring gives you 24 hour access to your fuel inventory

DEF

Blue DEF Diesel Exhaust Fluid is a mixture of high purity synthetic urea and deionized water that is approved for use in all diesel Selective Catalytic Reduction (SCR) Systems. Certified by the American Petroleum Institute. Made from high purity urea and deionized water.

LP GAS DELIVERY

Whether for home heat, farm use or commercial use, trust our team to reliably deliver the LP gas you need. We offer budget plans, summer fill program and a program where you can prepay at summer fill prices.

ADVANTAGE LUBES – LUBE SCANS

Our Advantage Lubricant line is chemically formulated to deliver superior protection and performance. We carry a full line of lubricants for all your on and off road equipment. Lube Scans provide a preventative tool that lets you know how well your equipment is holding up to stop problems before they occur.

Fuel Contracting

The SynEnergy Price Risk Management / Hedging Program is a contractual agreement that allows our fuel customers to lock in fuel prices for a specific period of time, helping them minimize fuel price risk and better manage their fuel budget to control energy costs.

Because we understand that all of our customers have unique energy needs, our fuel contracting program doesn't follow a one-size fits all approach. Contracting is ideal for customers with both large and small scale fuel needs.

- You pick the fuel amount
- You pick the contract period
- You pick the delivery schedule

Let us monitor the markets and take the gueswork out of fuel purchasing for you.

CountryMark Fuels and Lubricants

SynEnergy is a proud distributor of CountryMark fuels & lubes.

CountryMark's complete line of premium quality liquid fuels begin with light, sweet American crude oil brought in from Illinois, Indiana and Kentucky. This American crude is refined to the highest specifications at the CountryMark refinery in Mt. Vernon, Indiana.

At SynEnergy, customer service is our top priority! Our goal is to provide the best products at the best price and the finest service in the markets we serve.

At SynEnergy, **"We're a Service Company."**

"We're a Service Company"

About Us

SynEnergy Partners is the best source within southern Indiana, Illinois and Kentucky for customers who want an energy partner who understands their business, delivers quality fuels and lubricants, and supports the communities where they live and work. At SynEnergy Partners, this is how we deliver on our promise to our customers.

We deliver **American-made CountryMark fuels** because we believe in the quality of American-made fuels and what these fuels do for our local economies.

We offer better **price risk management and hedging tools** than our competitors. We're proud of our unique fixed and flex contracts and what these options mean to our customers.

We support our local communities. As a **farmer-owned cooperative**, our profits stay local, benefitting the communities we serve because at SynEnergy, We're a Service Company.
